

PROUTY ASKS PROBE OF DISTRICT AFFAIRS

Wants Congress to Determine
If Washington Is Capable of
Self-Government.

(Continued from First Page.)
also is the author of a bill to solve the
assessment problem here. He proposes
that the value of improvements be
listed separately from real estate and
that 5 per cent a year be deducted for
depreciation of improvements. He pro-
poses a further reduction of 10 per
cent a year, for five years, in the as-
sessment of improvements. He also
entirely abolishes the tax on the
single tax idea. Mr. Bailey would ex-
empt personal property of all kind
from taxation.

George Tax Bill Is to Be Redrafted by Prouty

The George tax bill providing a new
system of taxation in the District is to
be redrafted so that its provisions will
include intangible and personal property.
This redraft, decided upon today by
a majority of the District Committee, is
to be made by Congressman Prouty of
Iowa. This meets the determination of
a majority of the committee, led by
Chairman Johnson, to tax intangible
property, counter to the hopes and judg-
ment of District residents and officials.
Originally the bill provided for the
taxation of real estate only at full
value. Last Thursday, personal and in-
tangible property was added, and con-
sequently remaining sections of the bill
are out of plumb with the amended first
and second sections. Mr. George, being
out of sympathy with the proposal to
redraft the language of the bill so as to
include property other than real estate,
suggested that Mr. Prouty, author of
the amendment which brought on the
trouble, be given the task.

Mr. Prouty reluctantly agreed, and
has to leave the redrafting of the bill
for final action Thursday.
Chairman Johnson thought the bill
could be perfected by the redrafting of
the "real estate" wherever they occur
in succeeding sections and inserting
"taxable" wherever they occur. He
feared confusion, and also wants two
boards on assessment—one for personal
property and the other for real estate.
The discussion prevented the committee
from making progress and its refer-
ence to Mr. Prouty was finally ordered.
The committee went on record in
favor of an amendment, which will
have the effect of making the tax on
District residents to be named as tax-
assessors and assistant assessors. It is
provided that the only qualification for
being a good moral character and com-
petency. The Commissioners, under such
provisions might go outside the Dis-
trict for capable men, if they saw fit.

Commissioners Oppose Bills Fixing Working Day

The Commissioners sent to Congress
today unfavorable reports on the bills
to regulate the hours of labor on con-
tracts in the District and prohibiting
labor on buildings on Sunday. The Com-
missioners say the bills are not reason-
able and that the enactment of the former
bill would be a hardship on the employ-
ees. They are required by act of Congress,
approved June 19, 1912, to include in
contracts a provision that no laborer or
mechanic shall be permitted to work
more than eight hours in any one calen-
dar day.

In reference to the bill prohibiting
Sunday labor, the Commissioners say
the amount of such work is inconsid-
erable and the enactment of the law
would prohibit its performance would
be detrimental to the public good.
Reports also were made of several
other bills affecting the District. As a
substitute for the House bill to change
the method of garbage collection, which
says does not provide definite means
for doing the work, the board recom-
mends the adoption of the House bill
in which provision is made for an ap-
propriation of \$10,000 for the collection
and disposal of city waste.

Acid Stomachs Are Dangerous

Common Sense Advice by a Dis-
tinguished Specialist.

"Acid" stomachs are dangerous be-
cause acid irritates and inflames the
delicate lining of the stomach, thus
hindering and preventing the proper ac-
tion of the stomach in the leading to
probably nine-tenths of the cases of
stomach trouble from which people suffer.
Ordinary medicines and medical
treatments are useless in such cases,
for they leave the source of the trouble,
the acid in the stomach, as dangerous
as ever. The acid must be neutralized,
and the formation prevented, and the
best thing for this purpose is a tea-
spoonful of bisphosphate of soda, a sim-
ple antacid, taken in a little warm or
cold water after eating, which not only
neutralizes the acid, but also prevents
the fermentation from which acidity is
developed. Food which is indigestible
causes greatest distress may be eaten
with impunity if the meal is followed
with a little bisphosphate of soda, which
can be obtained from any druggist, and
should always be kept handy.—Adv.

FIGHTS THE GALLOWS

LEO M. FRANK.
This is a reproduction of the condemned
man's latest photograph.

widen any street, avenue, road, or
highway, in accordance with the high-
way plan.
Prior to the passage of this act it
was necessary in providing for all
street extensions that separate mea-
sures be introduced in Congress.
Unfavorable action is recommended
also on the bill to acquire certain land
in Washington Heights for a public
square to be known as Columbia
square. The board already has recom-
mended the acquisition of a park in the
northeast section and say that in their
judgment, this is the only park which
should be acquired at the present time.
Unfavorable action is recommended on
the bill providing for the extension of
Albermarle street, from Wisconsin ave-
nue to Thirtieth street, the exten-
sion of M street, from Fifteenth street
to Twentieth street northeast, the ex-
tension of First street east, and the
widening of Benning road. Existing leg-
islation, the Commissioners point out,
authorizes them to provide for street
extensions. The legislation proposed is,
therefore, unnecessary.

Labor Federation to Fight Prouty Measure

The members of the Maryland State
and District of Columbia Federation of
Labor have been called upon by their
officers to do everything in their power
to defeat the Prouty amendment to the
George bill and at the same time to
oppose every effort to have the George
bill in its original form enacted into a
law.
The legislative agent of the organiza-
tion in the District, P. J. Ryal, re-
ceived a letter today from J. R. Nott,
secretary-treasurer of the organization,
directing him to start a campaign
against the bill immediately. There are
said to be 150,000 members of the or-
ganization in Washington and Mary-
land and every effort will be made to
enlist the aid of the individual mem-
bers in the work.

An unfavorable report is made on the
bill providing for the construction of a
bridge across the Anacostia river. The
Commissioners say the existing bridges
are sufficient for the present and near
future. They recommended unfavorably,
also, on the bill introduced by Con-
gressman Ben Johnson to amend the
current District appropriation bill by
repealing the section authorizing the
Commissioners to extend, open, or

Acid Stomachs Are Dangerous

FRANK'S LIFE HANGS ON DIM PENCIL LINE

Counsel Hopes to Prove the
Famous "Death Note" Was
Not Written in His Office.

ATLANTA, Ga., March 10.—On the
faintest, lightest carbon impression of
the signature, "H. F. Becker," hangs
the hope of the friends of Leo M. Frank
that he will not be hanged for the mur-
der of Mary Phagan, for which he
stands convicted. The attorneys for
the condemned man believe that new
evidence they have discovered within
the last week will obtain a new trial
and a reversal of the verdict that was
pronounced against him.
The so-called "death note," which
played so important a part in the pro-
secution of Frank was written on an
order blank. It was contended by the
prosecution at the trial that the note
was written in Frank's office at his
dictation. The discovery that has been
made is that the blank on which the
note was written is an old, used order
blank that had been signed by the
corner master mechanic of the manu-
facturing establishment in which Frank
was employed, and in which the murder
is alleged to have been committed.
The faint traces of the signature of
this man, H. F. Becker, were found on
the blank. It was only the carbon im-
pression of the signature. This led to a
search of the orders that were signed
by this man—they were all numbered—
and it was discovered that the original
of the number borne by the death note
was signed in 1909, and that the dis-
carded book of duplicates had been
placed in a pile of trash in the base-
ment where the body was found.
If this evidence is found to be true,
it will upset entirely the story told
by the star witness for the prosecu-
tion, who testified that the note was
written on an order blank Frank took
from his desk, and that it was one of
the blanks. The friends of Frank contend
that they can show the blank could
not have been in Frank's office, but
that it was really in the basement
pile of trash and that it was obtained
there.

The defendant's attorneys are still
investigating. The W. J. Burns de-
tective agency is working on the case
and no steps will be taken for the
prisoner until the detectives complete
their investigations.
"Fads in the schools not only in-
crease the cost to the community,"
said Mr. Colpoys, "but they lessen
the usefulness of the schools to the
pupil."
"A pupil does not get as much now
in the grades as he did formerly. I
have no fault to find with sewing,
cooking, drawing, or carpentry in
the schools for those who can afford
the time. But with many poor boys
who must go to work early, these
things are robbing them of time they
might put to better use."
"We should be the ones to favor
such courses as those in carpentry
and cooking and drawing. But I am
convinced that the smattering of
these subjects pupils get in the
schools is of little practical value.
But the maintenance of the courses
costs heavily."
The labor union has received the
endorsement of schools in its fight
for free text books throughout the
system.

THE WEATHER REPORT.

For the District—Fair tonight;
Wednesday, increasing cloudiness;
Maryland—Fair tonight; Wednesday,
increasing cloudiness; light to moderate
variable winds.
Virginia—Fair and warmer tonight;
Wednesday, unsettled, probably rain in
west portion; light to moderate west
winds.

The temperature today as registered
at the United States Weather Bureau
and Airfield:

SAYS MOST CITIES PROVIDE FREE BOOKS

Colpoys Finds Per Capita Cost
of High School Education Is
High Here.

(Continued from First Page.)
all, Fall River, Worcester, Detroit,
Minneapolis, Omaha, Jersey City,
Newark, Paterson, Buffalo, New
York, Syracuse, Cleveland, Dayton,
Philadelphia, Pittsburgh, Provi-
dence, Richmond, Seattle, and Spo-
kane.
A large number of incidental ex-
penses in the Washington high
schools, asserts the labor secretary,
are charged to the high cost
of the high school course.
"In trying to strike a general aver-
age of cost to parents," Mr. Colpoys
explained, "we first consider
such items as car fare, textbooks,
and the boys' cadet suits."
Majority Must Ride.

A large majority of high school
pupils must ride to school. Count-
ing forty weeks to the school year,
you have an outlay of \$20 for that
item alone. The initial outlay for
books is not less than \$5, if the
books are purchased new from re-
tail dealers. By the end of the year
this item is increased from \$2 to \$4
for other books in the English
course, notebooks, etc.
"After that time channels of ex-
penditure vary with the different
schools. In some schools there are
locker fees; at McKinley there are
mechanical drawing sets, costing
about \$3.50; to be bought; in all the
schools, if the pupil takes physics
or chemistry, there are laboratory
fees. In business high school there
are extra expenditures for paper,
and for girls there are gymnasium
suits to be bought; if the girls are
to have advantage of physical train-
ing."

In addition to these expenses, Mr.
Colpoys said, there are other ex-
penses that must be met by a pupil
less he is to be socially educated.
There are the athletic association
fees, the subscriptions to school pa-
pers, the dramatic productions, lun-
cheons, and so on.

Criticism For "Fads"

"Fads in the schools not only in-
crease the cost to the community,"
said Mr. Colpoys, "but they lessen
the usefulness of the schools to the
pupil."
"A pupil does not get as much now
in the grades as he did formerly. I
have no fault to find with sewing,
cooking, drawing, or carpentry in
the schools for those who can afford
the time. But with many poor boys
who must go to work early, these
things are robbing them of time they
might put to better use."

"We should be the ones to favor
such courses as those in carpentry
and cooking and drawing. But I am
convinced that the smattering of
these subjects pupils get in the
schools is of little practical value.
But the maintenance of the courses
costs heavily."

Socialists Force Out Italian Government

ROME, March 18.—Giovanni Giolitti,
premier of Italy, and his cabinet re-
signed this afternoon. The withdrawal
of the cabinet was due largely to the
socialist opposition in the chamber of
deputies to the appropriation of the gov-
ernment's expenditures in the war with
Tripoli.

Committee of 100 Educate Congress

Action Likely on District Tax Problems at Meeting
of Body to Be Held at the Willard
Tomorrow.

Dignified, yet decisive action by the committee of 100, in support
of the present District of Columbia tax system, is likely at the meeting
of that body tomorrow at the New Willard, when a report of the execu-
tive committee will be made by its chairman, Henry B. F. Macfarland.

The report will emphasize the fact that the committee's activities
are to be for the continued progress of Washington. To bring this
about, the committee believes, it must quicken the interest of Con-
gressmen and citizens of the nation at large in the National Capital.

WILL EDUCATE LEGISLATORS.

A system of education, of enlight-
enment to acquaint members of both
branches of Congress with the com-
plicated requirements that exist
here, will be the plan put up to the
entire committee tomorrow. How
necessary to the progress of Wash-
ington is the fact that the Federal
and local governments should share
alike in the expenses of the District
will be shown by the citizens.

The purpose of the committee will
be to inform members of Congress
how much property there is in the
District; how much of it is owned by
the Federal Government, and is
therefore exempt from taxation, and
how much remains on which private
owners are required to pay taxes.

An endeavor will be made to con-
vince Congress of the impracticability
of the property-owning public of
Washington to contribute revenues
sufficient to develop the city in a
manner demanded by Washington's
important and dignity as the Capital
of the United States.

Agree On Objects.

The object, purpose and methods
of the Committee of 100 were agreed
on at a meeting of the executive
committee in the office of Mr. Mac-
farland last night.

The executive committee members
believe the Capital can be preserved
only by the equal participation of
the nation and the District in the
cost of operation, maintenance and
improvements, "according to the pur-
pose of the founder, George Wash-
ington, and in conformity with his

ministers who want to pray for me,
healthy citizens who want to fight
for me, and women, to whom the
language said to have been used by
Johnson was distasteful, who want
me to know it."

Girl Keeps Her Wits; Intruder Is Captured

How an eighteen-year-old girl main-
tained her presence of mind on dis-
covering a colored intruder hiding in
the curtains of the parlor of her home
and succeeded in having him captured
was told in the Police Court today
when Manning C. Jones, colored, was
arraigned on a charge of housebreak-
ing.

Miss Mary Brooks, daughter of Lee
Brooks of the Lucerne apartments,
told how on drawing aside the cur-
tains between two rooms, she discov-
ered a man, standing with his back to
her.
"I was so scared I couldn't make
an outcry," declared Miss Brooks. She
said she walked with apparent poise
to the rear of the apartment and
there told her brother. The intruder
was apprehended by the janitor. Jones
was held in \$2,000 bond for the
actio not the grand jury. The
court has ordered that he undergo
mental observation before he is taken
to the grand jury.

GRANDMA USED SAGE TEA TO DARKEN HAIR

She Mixed Sulphur With it to
Restore Color, Gloss,
Thickness.

Common garden sage brewed into a
heavy tea with sulphur and alcohol
added, will turn gray, streaked and
faded hair beautifully dark, and luxu-
riant, remove every bit of dandruff,
stop scalp itching and falling hair.
Just a few applications will prove a
revelation if your hair is fading, gray
or dry, scraggly and thin. Mixing the
Sage Tea and Sulphur recipe at home
though, is troublesome. An easier way
is to get the ready-to-use cosmetic, known
as about 50 cents a large bottle at drug
stores, known as "Wyeth's Sage and
Sulphur Hair Remedy," thus avoiding
a lot of fuss.

While wispy, gray, faded hair is not
sinful, we all desire to retain our youth-
ful appearance and attractiveness. By
darkening your hair with Wyeth's Sage
and Sulphur, no one can tell, because
it does it so naturally, so evenly. You
just dampen a sponge or soft brush
with it and draw this through your
hair, taking small strands at a time;
by morning all gray hairs have dis-
appeared, and after another application
or two your hair becomes beautifully
dark, glossy, soft and luxuriant. Wyeth's
Chemical Co., New York. Agent,
O'Donnell's Drug Store.—Adv.

OUCH! LAME BACK RUB PAINS AWAY

Rub Backache away with a
small trial bottle of old
"St. Jacobs Oil."

Kidneys cause Backache? No! They
have no nerves, therefore can not cause
pain. Listen! Your backache is caused
by lumbago, sciatica or a strain, and
the quickest relief is soothing, pen-
etrating "St. Jacobs Oil." Rub it right
on the aching or tender spot, and in-
stantly the pain, soreness, stiffness and
lumbago disappear. Don't stay crippled!
Get a small trial bottle of "St. Jacobs
Oil," from your druggist and im-
mediately apply it. It is applied
you'll wonder what became of the back-
ache, sciatica or "lumbago" pain. "St.
Jacobs Oil" cures lumbago, and doesn't
burn the skin.
It's the only application to rub on a
weak, lame or painful back, or for lum-
bago, sciatica, neuralgia, rheumatism,
sprains or a strain.—Adv.

An Easy Way to Get Fat and Be Strong

The trouble with most thin folks who
wish to gain weight is that they insist
on eating the stomach or stuffing it
with greasy foods; rubbing on useless
cream, or following some fool,
laxative, or cathartic, while the real
cause of thinness goes untouched.
You cannot get fat until your digestive
tract assimilates the food you eat.
Thanks to a remarkable new scientific
discovery, it is now possible to combine
into simple form the very elements
needed by the digestive organs to help
them convert food into rich, fat-laden
blood. This master-stroke of modern
chemistry is called Sargol and has been
termed the greatest of flesh-bu-
dars. Sargol aims through its regenerative,
reconstructive powers to coat the stom-
ach and intestines to literally soak up
the fattening elements of your food and
pass them into the blood, where they
are carried to every starved, broken-
down cell and tissue of your body. You
can readily picture the result when this
amazing transformation has taken
place and you notice how your cheeks
fill out, hollows about your neck, should-
ers, and bust disappear, and you take
on from 10 to 20 pounds of solid, healthy
flesh. Sargol is absolutely harmless,
inexpensive, efficient. Jas. O'Donnell's
Drug Store and other leading druggists
of Washington and vicinity have it and
will refund your money if you are not
satisfied as per the guarantee found in
every package.

CAUTION—While Sargol has given
excellent results in overcoming nerv-
ousness and general stomach troubles,
it should not be taken by those who
do not wish to gain ten pounds or
more.—Adv.
